RISKI ABDI RAHMAWAN

WEB DEVELOPER

PROFESSIONAL SUMMARY

I am an enthusiastic Informatics Engineering undergraduate with a passion for web development. I specialize in building responsive and dynamic websites using a range of technologies, including HTML, CSS, and PHP. My expertise extends to modern frameworks like Laravel, Bootstrap, and Tailwind, which I leverage to create user-friendly and scalable applications. With strong database management skills in MySQL, I am dedicated to crafting seamless web solutions that prioritize both functionality and performance.

EXPERIENCES

SIKAN | Project Base Learning

Developed SIKAN, an information system to manage transactions and sales reports for the JTI Polinema canteen. In this project, I act as the frontend by creating an interface for users that is user friendly and responsive. To create the interface I used CSS. In addition, I also made a design for the database using MySql.

SIWET | Project Base Learning

Developed the SIWET information system to manage the administration of citizen and PKK data in RW 10, Oro-Oro Dowo. In this project I am the backend by creating functionality on the web using the Laravel framework. In addition, I also create designs and databases using MySQL.

COURSE

Fundamental SQL, DQLab (March, 2024)

Learn how to use the SELECT command to retrieve data from a database. The lessons include how to select specific columns, use the WHERE clause to filter data based on certain conditions, and ORDER BY to sort the results. You will also learn about JOIN to join tables, the use of GROUP BY to group data, and aggregations such as COUNT, SUM, and AVG. In addition, the LIMIT technique to limit the number of results and the use of subquery for nested queries are also frequently discussed.
